Morning Meeting of 20 February 1967

25X1 DD/I called the Director's attention to a Washington Post article by John Chamberlain concerning the reported sighting of a strategic missile in Cuba. [REDACTED]

Godfrey briefed the Director on the latest developments in China, calling attention in particular to indications that people sent to the provinces two to three years ago are taking advantage of the present confusion to return to their homes. He felt this could cause some dislocation in production.

The Director asked Warner to be careful to communicate his whereabouts to the O-DCI during the course of the day.
